# Move Your Old Reporting of Job Sites to Modern Reporting with Digital Secure Daily Reports

Integrating Raken and Egnyte so that our daily reports were automatically synced to an Egnyte project folder was a no-brainer.

—Dominic Silvia | IT Department Lead

## The Problem

For construction projects of any size, there are numerous stakeholders and countless documents that must be created, organized, filed, and saved. The challenge is to make sure documents are securely and accurately stored and shared with the correct individuals. Equally important is ensuring that documents that can protect the general contractor from costly litigation are being created and safely stored.

Due to their frequency and detail, daily reports offer critical back-up in litigation cases. Often, however, daily reports are handwritten, contain inaccurate information from any number of subcontractors, or are sometimes missed entirely. Additionally, they are a time sink.

Level 10 sought a solution to ensure daily reports, subcontractor dailies, files, photos, and videos were collected and shared accurately with the project managers and owners that need to see them. They wanted a way to easily sync these documents to their cloud-based project storage provider, so they could gather all of their important construction documentation in one place.

Saving time and protecting construction firms with seamless reporting and file storage.

## The Solution

Egnyte and Raken partnered to solve exactly this problem. Level 10 was already utilizing Raken and Egnyte for its daily reporting and cloud storage solutions, respectively.

By taking the next step and deploying the Raken and Egnyte integration, the firm was able to sync a project's Raken daily reports, subcontractors daily reports (Super Daily), files, videos, and photos with its Egnyte project folder.

Files now are automatically organized within a clean folder hierarchy, placing all construction documents into one easy-to-access location.

The one-time integration setup takes seconds and doesn't require a change in behavior for the superintendent logging daily reports. Once they sign their daily report, it's automatically synced to an Egnyte project folder where it's securely stored alongside their other important construction documents.

## Benefits

By utilizing this integration, Level 10's daily reports, subcontractor dailies, and photos are now available to all stakeholders involved in the construction project, alongside other critical project files. Superintendents will no longer need to manually download and transfer their daily reports and field photos in order to share them with the wider team.

Technology has a major part to play in running an effective organization, and we saw a huge opportunity with Raken...The product's focus on mobile is perfect for our superintendents in the field, making it easy for them to capture important events and communicate them quickly. It's a game-changer for how we use field information in our decision making. Egnyte's ability to provide seamless access to our content streamlined our workflows and made our teams more efficient."

—Dominic Silvia | Level 10 IT Department Lead

## COMPANY

Level 10 Construction is a full-service general contractor with offices throughout California, including Sunnyvale, San Francisco and San Diego. Level 10 is focused on providing innovative facilities to the corporate, healthcare, education, hospitality, technology and life science markets.

Level 10 offers a full range of services including preconstruction, design- build and integrated project delivery, self-performed concrete work, MEP and commissioning services, BIM services, green construction and Lean construction practices.

Level 10's core mission is to build at the highest level, consistently providing excellent customer service while delivering quality projects on time and on budget.

The superintendents using Raken all report increased compliance, especially with the Super Daily...It takes the pain out of gathering reports from subcontractors, and we've noticed a marked improvement in not only the quality of reporting but their attitude towards reporting as well.

—Jacob Freitas | Project Manager

## With the Raken and Egnyte integration

- ✓ Share completed daily reports and photos directly from the field
- ✓ Automate your document collection processes and record keeping
- ✓ Organize your Egnyte folder to include all of your important field documentation
- ✓ Improve site compliance with consistent documentation between platforms
- ✓ Save time and improve project visibility
- ✓ Easily access a record of all your project documentation at any time
- ✓ Protect yourself from future litigation

## Conclusion

The Raken and Egnyte integration can benefit projects of any size, saving time, improving compliance, and protecting from litigation.

## In Partnership with

Raken provides innovative mobile technology to streamline field workflows for construction workers. Raken's "digital toolbox" connects the field to the office with daily reports, time cards, project insights, photo management, and more.

Clark Construction, AECOM, Skanska, Whiting-Turner, Hensel Phelps, and thousands of the world's top construction companies use Raken to solve their field reporting needs.

## EGNYTE

In a content critical age, Egnyte fuels business growth by enabling content-rich business processes, while also providing organizations with visibility and control over their content assets. Egnyte's cloud-native content services platform leverages the industry's leading content intelligence engine to deliver a simple, secure, and vendor-neutral foundation for managing enterprise content across business applications and storage repositories. More than 16,000 companies trust Egnyte to enhance employee productivity, automate data management, and reduce file-sharing cost and complexity. Investors include Google Ventures, Kleiner Perkins, Caufield & Byers, and Goldman Sachs. For more information, visit [www.egnyte.com](http://www.egnyte.com)
