EGNYTE
Professional Services
Delivering positive change for our customers

Your data is your superpower. You need to do everything possible to not only protect it but turn it into action. Employees need the ability to collaborate everywhere. And you need the confidence that your data is secure. That is more than a technology challenge, it's a business challenge.

A comprehensive content governance program will not only improve productivity it will lower your overall risk posture. But implementing and continually managing a complete governance program that delivers the shortest time to value requires expertise. You need a partner that's done this before.

Why work with Egnyte Professional Services?

|	
Unparalleled Technical Expertise	Access to highly skilled technology professionals in content collaboration and governance with immediate reach back to Egnyte Product and Engineering teams.
Incorporate Best Practices	Subject matter experts will provide and implement best practices to maximize efficiency and address any knowledge gaps.
Fast and Painless Transition	Our world class team will enable you to easily and quickly transition to an operational state on the Egnyte platform resulting in an accelerated timeline towards maximizing the technology potential and ROI.

A comprehensive suite of services to get your content governance program up and running quickly:

- Strategic Foundation and Assessment
- Deployment
- Data Migration
- GxP Services for the Life Sciences
- Governance Operationalization
- Governance Heath Check
- Customer Development
- Enablement Services

> With a great partner like Egnyte, we spend less time keeping baseline services functioning at enterprise levels and more time working on the next strategic initiative that can move our college forward.

— Reed A. Sheard **|** CIO, Westmont College

WESTMONT
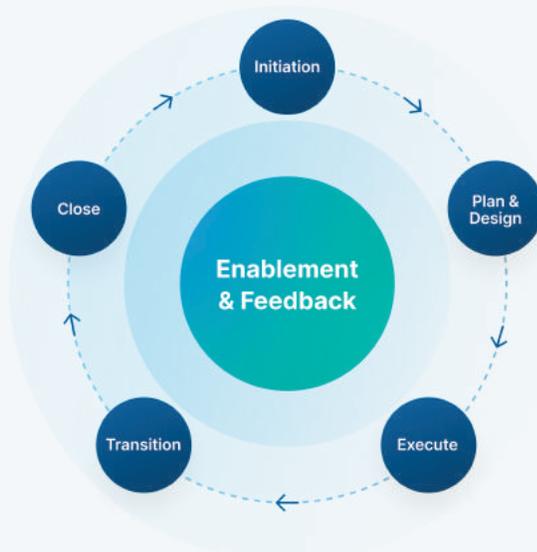

Faster, simpler, and more secure.

That is what you get with Egnyte Professional Services. We partner with you to deliver positive outcomes— accelerating deployment and configuration, data migration, integration with third party applications, and conducting compliance and governance maturity assessments that enable you to achieve value faster.

Our world-class team uses a simple, but effective, delivery methodology which focuses on continuous enablement and iterative feedback to execute flawlessly, identifying issues and opportunities before it is too late to adjust. The result— a strong foundation that is secure, compliant and scalable, unlocking widespread adoption and empowering your teams to work more effectively.
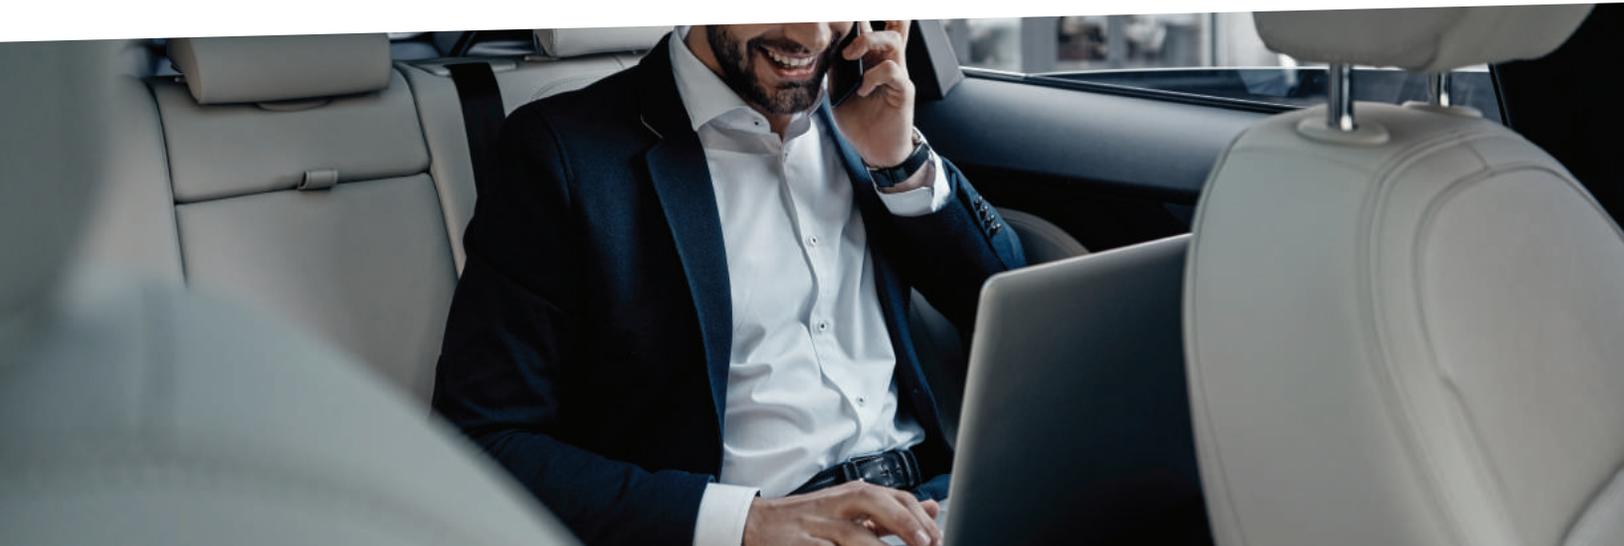

There are several ways to engage Egnyte Professional Services, either through bespoke projects or one of our prepackaged engagements.
